Wealth & Legacy Structuring

Protect what you have built. Structure what you own.
Plan what comes next.

Your wealth, business interests and family responsibilities are connected. The legal arrangements supporting them should be considered together.

At PMA Advocates LLP, we advise individuals, entrepreneurs and families on the legal structures that support wealth preservation, clear ownership and the transition of assets and businesses across generations.

We bring together trusts, succession planning, family governance and corporate and investment structuring to create arrangements aligned with your circumstances and long-term objectives.

Trust & Wealth Preservation

Clear ownership and governance arrangements can support the long-term stewardship of family and investment assets. We advise on the establishment, review and restructuring of trusts and related legal arrangements, with attention to how assets will be held, managed and transferred.

- Trust governance arrangements
- Review and restructuring of existing trusts and ownership arrangements
- Structuring of family and investment assets

Succession & Legacy Planning

Succession planning is about more than transferring assets. It also means preparing for changes in ownership, leadership and responsibility.

We help individuals, business owners and families put legal arrangements in place for the orderly transition of wealth and business interests. Our advice considers both present needs and the intentions of those planning for the next generation.

- Personal and family succession planning
- Estate and asset transition planning
- Business succession and continuity planning
- Ownership transitions
- Intergenerational wealth transfer

Continuity across generations.

Family Business Governance & Continuity

Family businesses bring ownership, relationships and commercial decisions together. We help families establish legal and governance frameworks that clarify responsibilities, guide decision-making and support continuity as the business and family evolve.

- Family governance structures
- Ownership, control and shareholding arrangements
- Decision-making and governance frameworks
- Leadership and generational transitions
- Business continuity planning
- Arrangements for the next generation's participation

An integrated approach

We consider your businesses, investments, property and family interests together. Where appropriate, we work alongside your accountants, wealth managers, financial advisers and trustees to coordinate the legal arrangements with your wider plans.
